

CLICKCON
PHOTOVOLTAIC MOUNTINGSYSTEMS

Solar canopies with a system

For carports, patio roofs, car parks and large-scale projects

ClickCon develops mounting systems for rainproof, durable and cost-effective PV roofs – backed by planning expertise and technical support; from small carports to large-scale car park canopies.

**Easy for
installers**

**Scalable for
Companies & EPCs**

**Planning &
technical support**

— From the initial design to the finished canopy – ClickCon will guide you through your project

WHY CLICKCON

We don't just supply components.
We make it easy to plan canopy systems.

Solar canopies must be technically functional, economically viable and easy to install on site. This is exactly where ClickCon comes in: with in-house development, years of experience and personalised technical support.

In-house system development

Our solutions are born out of practical experience and are developed to meet real-world project requirements.

Rain-proof PV roofs

The mounting system, in combination with the PV modules, forms a rainproof roof surface – without the need for an additional roof underlay.

Planning and technical support

We can assist with system selection, technical queries, customised solutions and project-specific planning.

Scalable applications

From single-car carports to large-scale car park canopies and other PV applications

“ We develop solutions that make projects simpler, safer and more cost-effective.

Alexander Koller
Founder and CEO

Planning & Support – a key advantage

Our customers particularly appreciate the personal advice, technical expertise and prompt, solution-oriented support.

Over 20 years of experience. More than 8.000 completed PV projects worldwide.

ClickCon is synonymous with well-designed PV mounting systems that have been developed based on real-world experience. Since 2009, we have been creating solutions for projects where standard products often fall short: safe, flexible, durable and easy to install.

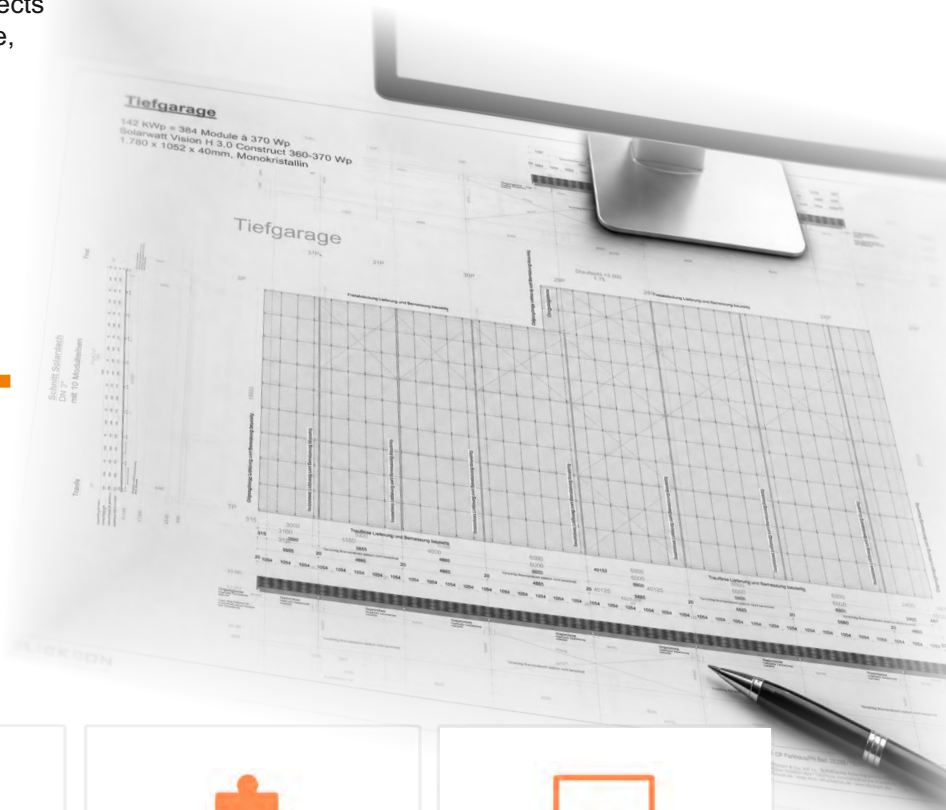

20+

Years

8.000+

Projects

Developed from practical experience

ClickCon's roots lie in solar project planning.

Proven system technology

The installation systems combine water resistance, ease of installation and high flexibility.

For standard and customised solutions

Suitable for carports, terraces, car parks, multi-storey car parks and individual project requirements.

Digital planning tool

The ClickCon calculator can be used to calculate small to medium-sized PV projects online.

Further developments from our company

ClickWall - the PV fence and privacy screen system

Flexible PV fencing solution for framed standard modules.

ClickFacade - the PV façade system

The mounting system for PV façades and PV-powered cold stores.

Together, we will find the best solution for your project.

Migros Pfungen: 1.800 m²Solar roof installed in just 6 weeks

A car park canopy that combines sustainability, design and functionality.

370 kwp
Performance

1.800 m²
Area

360.000 kWh/Year
Output

70
Parking spaces

6
construction time

For the new photovoltaic carport system in Pfungen, Migros opted for a solution that combines electricity generation, weather protection and architectural quality. The design and initial planning were carried out by ClickCon, and the PV roof was completed in just six weeks.

The ClickPlain PRO mounting system with MAX purlin profile – developed for large-scalePV roofing – was used. The PV modules, in conjunction with the mounting system and without the need for sealant, act as the water-bearing layer, meaning no additional roof covering is required.

What this project shows

large-scale solar roof

short construction time

rainproof PV roof

great practical value

Our references

What began as an idea for a better rooftop PV solution has now become an internationally used mounting system for a wide range of applications. The following references provide an overview of completed projects – from compact carport solutions to large-scale car park canopies.

01 Project Offenbach

PERFORMANCE	10 kWp
AREA	66 m²
OUTPUT / YEAR	9.800 kWh

02 Project Neu-Anspach

PERFORMANCE	402 kWp
AREA	2.250 m²
OUTPUT / YEAR	380.000 kWh

03 Project Albstadt

PERFORMANCE	130 kWp
AREA	750 m²
OUTPUT / YEAR	120.000 kWh

04 Project Skövde, Sweden

PERFORMANCE	1.400 kWp
AREA	9.800 m²
OUTPUT / YEAR	1.470.000 kWh

05 Project Vilsbiburg

PERFORMANCE	1.280 kWp
AREA	7.200 m²
OUTPUT / YEAR	1.260.000 kWh

06 Project Adelsmannshausen

PERFORMANCE	53 kWp
AREA	360 m²
OUTPUT / YEAR	53.000 kWh

07 Project Grünheide

PERFORMANCE	980 kWp
AREA	5.000 m²
OUTPUT / YEAR	970.000 kWh

08 Project Rheinfelden

PERFORMANCE	160 kWp
AREA	800 m²
OUTPUT / YEAR	170.000 kWh

Every project is different. Our system remains flexible.

Two in-roof systems for different requirements

ClickPlainFast and ClickPlain PRO by comparison

Whether you're looking for a cost-effective standard solution or a high-performance premium system – ClickCon offers the right in-roof mounting system for a wide range of project requirements.

New 2026World-Premiere at Intersolar

ClickFast

The simple and cost-effective system

-  simpler in design
-  significantly cheaper
-  Fast, easy installation
-  Focused range of features
-  for standard, cost-effective applications

-  statically and functionally consciously reduced compared to ClickPlain PRO.

ClickPlain PRO

The high-performance in-roof system for more advanced projects

-  higher static load-bearing capacity
-  more features
-  for complex projects
-  more flexible to use
-  proven premium system

-  The right choice when higher demands are placed on structural integrity and functionality.

	ClickFast	ClickPlain PRO
System type	In-roof mounting system	In-roof mounting system
Positioning	simple & cost-effective	powerful & versatile
Assembly	super easy	flexible & established
Statics	for standard requirements	for moredemanding requirements
Features	reduced	extended
Ideal for	cost-effective projects	demanding projects

We help you choose the right system

We are happy to help you choose the right system –tailored to the size of your project, your budget and your technical requirements.

APPLICATIONS

The right solar roof for your project

ClickCon mounting systems are extremely versatile – from compact canopies for private or commercial use to large-scale solar roofs for businesses, local authorities and infrastructure projects. Projects already completed: from carports and car parks to cycle path and motorway canopies, stadium roofs, industrial and agricultural buildings, as well as riding arenas and stables.

For installation companies and craft businesses

Ideal for small and medium-sized projects where simple planning, quick installation and reliable technology are essential.

- ✓ Carports und Bikeports
- ✓ Patio roofs and canopies
- ✓ small commercial canopies
- ✓ individual customer solutions

★ **Your benefits:** a practice-proven system and technical support for planning, design and implementation.

For EPCs, companies and municipalities

Ideal for larger projects where scalability, planning certainty and technical support are crucial.

- ✓ Car park canopies
- ✓ Parking garages
- ✓ Charging infrastructure
- ✓ Sports fields and stadium roofs
- ✓ Industrial and agricultural buildings
- ✓ Riding arenas and stables
- ✓ Customised solutions

★ **Your benefits:** a flexible system solution, extensive project experience and technical support, even for complex requirements.

WE ARE HERE FOR YOU

Plan your next solar canopy project with ClickCon

Whether it's a small carport, a patio canopy or a large-scale car park canopy: ClickCon supports you with proven system technology, planning expertise and technical support. Personal, practical and solution-oriented – from the initial design right through to technical support.
