PHOTOVOLTAIC MOUNTINGSYSTEMS

Your benefits at a glance

The ClickFast in-roof system was developed for particularly fast, cost-effective and simple PV installation.

1. Only 2 main components

2. Fastest installation – modules are simply slid into place

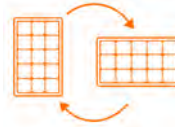

3. Extremely cost-effective

4. Rainproof

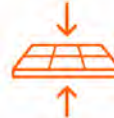

5. For all framed standard modules

6. Portrait and landscape installation possible

7. No rubber seals or other gaskets

8. Installation and removal from below

9. Installation on timber or steel purlins

10. Cable duct can be integrated – for clean cable routing

Ideal for cost-effective in-roof PV solutions with high installation efficiency.
